DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 17-19 are drawn to an apparatus, classified in class 606, subclass 102.
- II. Claims 14-16 are drawn to a method, classified in class 606, subclass 88.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed could be used to measure another bone, such as the distal end of a femur, or even the width of a humerus. The method as claimed could be implemented to measure another object. For example, the method of selecting and choosing the right sizer could be used to select the correct intervertebral prosthesis, or a sizer for a femur, or even an artificial bone plate.
